

Negative Pressure NFP Filter

Features:

- Negative pressure
- Fan on clean air side
- Mechanical shaker
- Optional tip bin or barrels

Tip bin Features:

- Holds 1 cubic yard of dust.
- Double the capacity of barrels
- Easy to remove and insert
- Wheels for easy movement
- Easy emptying
- View dust load through viewing window

The Superbag

Efficiency and low energy consumption

The Superbag is a polyester filter bag. A patented weaving technique in tubular format gives the filter bag a surface which can cope with varying dust loads and with virtually any type of dust. Better filtering efficiency is achieved with this unique filter media which provides low pressure drop, and low energy consumption.

Strength and durability

The special shape of the SUPERBAG helps to ensure that the high efficiency and effectiveness of the NFP filter system is maintained even after long periods of operation. The durability is the result of the patented construction, strong polyester fiber and seamless body. These features also help make cleaning of the filter bag very easy.
