

Industrial vacuum cleaner 500-series

Configurable industrial vacuum cleaner for liquid and coarse particle extraction

Not just an ordinary industrial vacuum cleaner but a configurable solution to customer's specific challenges within wet or dry vacuum cleaning.

Nederman offers a unique and wide range of possible vacuum heads in order to provide the ultimate solution for your specific application. Electric or compressed air driven vacuum heads, with different capacities, are available.

Single container system designed for the collection of coarse particles, such as swarf and granulates as well as liquids and sludge. The container collects and holds a large volume of material and can be equipped with a drain valve for liquids.

Depending on the application, there are different filter types and stages to choose from, like polyester filter bags, coarse filter bags and cartridge filters.

For applications when handling liquids the unit can be equipped with a float system that prevents overflowing of the container.

Trolley can either be a simpler 2-wheel trolley or a more robust and tiltable trolley with four wheels and forklift slots, all depending on your actual needs.

- Configured and customized industrial vacuum cleaner
- Wide range of vacuum heads, filters and other components are available
- High material collection capacity
- Also available in stainless steel, 316L.
- Float system prevents overflowing when handling liquids

Product name	Industrial vacuum cleaner 500-series
Compressed air consumption	1,0 to 9,5Nm ³ /min @ 7bar for A-units
Installation	Indoor, Outdoor
Application	Granulate, Chip, Liquid
Dustbin volume (gal)	160-220
Max Airflow (cfm)	306-690
Hose Diameter (in)	38-76
Hose length (ft.)	5-40
Power Voltage (V)	230
Frequency (Hz)	50/60
No of phases	1
Filter type	Bag
Number of filter elements	1
Type of hose	Without
Outlet	Drain Valve
Power (Hp)	2.5/2.4

Granulate Chip Liquid

*Couplings included, Ø 51 mm

**Without couplers

***ATEX - Suitable for combustible dust with MIE (minimum ignition energy) < 1mj. Ensure earthing to extraction unit. Not to be used in combustible gas atmospheres or extraction of explosive materials

****ATEX - Suitable for combustible dust (zone 20,21,22) and gas (zone 1,2) of group IIA , IIB and IIC. Ensure earthing to extraction unit. Not to be used for extraction of explosive materials

Industrial vacuum cleaner 500-series

*****ATEX - This product is suitable to be used as cleaning equipment for combustible dusts with MIE (minimum ignition energy) >1 mJ. Product is to be properly earthed to the extraction unit. Not for usage in combustible gas atmospheres or extraction of explosive materials.

*****Temp. - -25 to + 50 deg. C., Max vacuum - 50 kPa.

*****Couplings included Ø 2 inches
