Weldfilter–EC10/EC20

Nederman

NEW PRODUCT

Contact us or one of our dealers for introductory special offers

A mobile welding fume collector with high capture efficiency, product quality and great cost to benefit ratio

No excuse for not investing in a welding fume extraction unit

The new Nederman EC10 and EC20 WeldFilters are a mobile welding fume extraction unit offering easy, trouble-free operation and flexible access. They capture fume near the point of welding or source of the fume, which is the most effective way to collect and remove fumes. The EC10 and EC20 are fitted with arms that can be swivelled 360°. These extraction arms are flexible, easy to position and are not in the way during work. There is no impact on the welding process and the fume capture rate is excellent.

Ready to use

Just plug it in and start extracting those harmful welding fumes.

Cleanable filter – low filter cost

The cleanable long life cartridge filter keeps the operating costs low. The cleaning is done with an airgun (included) in a closed process and the dust is safely disposed in a bag.

- High efficient compact fan gives large air volume but low energy consumption
- Compact and user friendly design
- With 3 m extraction arm
- Cleanable filter – low operating cost
- Closed filter cleaning process (airgun included)
- Safe disposal of collected dust
