Nederman Architect, Engineer & Installer Program

Make the most of your projects

Products and solutions for filtering, cleaning
and recycling in demanding workplaces

Join forces with Nederman

By working closely together, we at Nederman believe we both can achieve more. It is about trust, commitment and actively supporting each other. We believe that by helping others to win, we increase the opportunity of a bright future for both of us.

When you work with us, you receive a set of benefits that can help you to better serve customers and save time and money while you strengthen your capabilities and improve the customer solution.

All supported by the Nederman brand and reputation as a global leader in supplying products and solutions protecting people, planet and production from harmful effects of industrial processes.

Simplify your work

The Nederman advantage

When specifying or installing Nederman products and solutions it will result in unique advantages for your customers. Here are a few examples:

Well-known brand

Nederman is a world-leading environmental company. With our comprehensive range of high quality products and solutions, you contribute to efficient production and reduced environmental impact in any workplace.

Quality and costs

For more than 70 years Nederman has been supplying innovative and high quality products and solutions satisfying a wide variety of customer demands. We continue to develop our products and solutions so that they remain relevant and in line with customer needs.

Experienced and knowledgeable

Nederman has a long history of providing products and solutions for filtering, cleaning and recycling. We know and understand the needs and challenges in all the industries we serve.

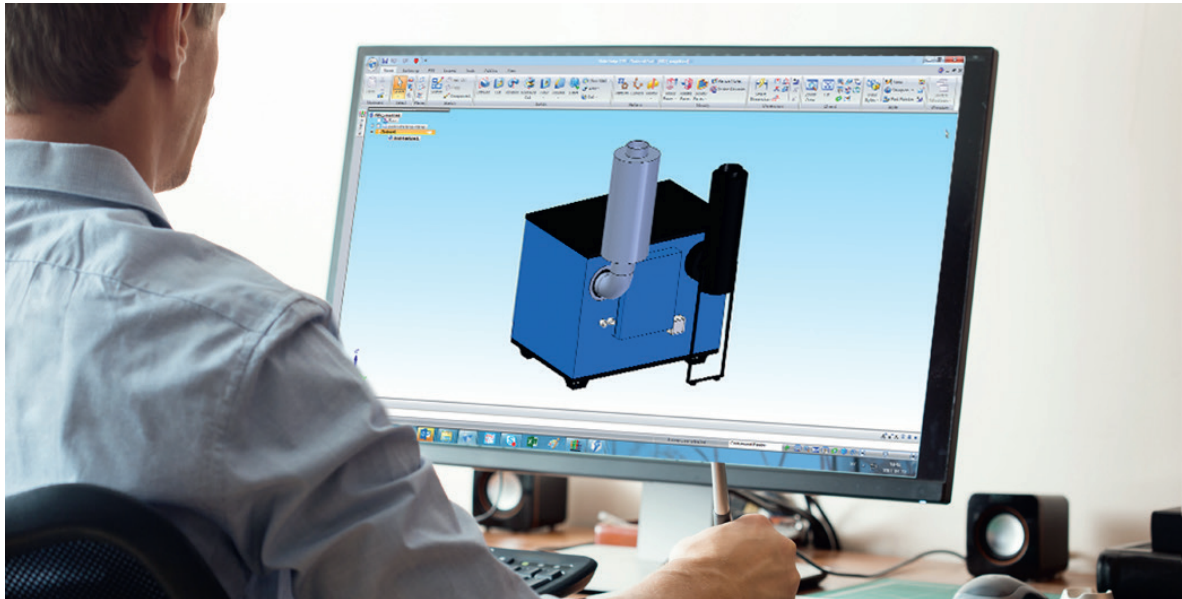

Service Care Agreement

The Nederman Service Care Agreement keeps the total costs of ownership optimized for the desired operational performance. We offer 24/7 help in case of emergency. Service requests will always be prioritized and handled with very short response time.

Rapid spare part availability

Within Nederman normal regular spare parts and consumables are on stock in our warehouses in Europe. In case of emergency we can deliver them quickly.

Leading solutions for improved workspaces

The Nederman Group is a world-leading supplier and developer of products and solutions within the environmental technology sector. We filter, clean and recycle in demanding environments.

Nederman's products and solutions contribute to improve production economics, reduce the strain on the environment from industrial processes, and protect employees from harmful dust and particles, fibres, gas, welding fume and smoke, vehicle exhaust and oil mist. Together with our range of supply systems for water, air, oil and other consumables, we make workspaces all around the world clean, safe and efficient.

Nederman also offers solutions for collecting, transporting and recycling dry or wet materials, masses and liquids. The applications are in industries working in tough environments where the demands for sturdy and reliable high performing equipment are of the utmost importance.

Industry solutions

Every application demands its own solution. Our mission is to help you achieve the optimum result regarding performance efficiency and payback whatever the application might be.
