

Reverse jet tubular bag dust collectors for many applications that generate light to heavy volumes of any dust

Suitable for many different applications that generate light to heavy volumes of any dust

The MJC range of reverse jet tubular bag dust collectors was developed for continuous operation in industrial process filtration and dust collection applications; incorporating patented Nederman UniClean cartridge technology for maximum cleaning efficiency and extended life.

Air Volume Range: 1.700 to 68.000 m3/hr (1,000 to 40,000 CFM)

Cleaning controller type NF8HD250 in IP65 enclosure, supply voltage 230/220/110V.

Key features:

Standard filter range from 48 to 739m2 (517 to 7,955 ft2); larger units possible

Typical airflow volumes up to 60.000m3/h (35,340 CFM), or more, subject top application

Robust weatherproof welded steel construction

Space saving integral fans from 0.75 to 18.5kW (1 to 25hp) Independently tested with ATEX compliant features for St1, St2 and St3 dusts

Integral pre-separation chamber, cross flow / down flow inlet air pattern

Wide range of discharge and waste handling options

Typical dust control and process applications:

 Suitable for many different applications that generate light to heavy volumes of any dust

Integral pre-separation chamber, cross flow / down flow inlet air pattern

Wide range of discharge and waste handling options

Typical dust control and process applications:

- · Shot, sand and bead blasting
- · Shot, sand and bead blasting
- Welding and cutting laser, plasma, arc
- · Chemical, plastics and pharmaceutical powders

Product name	MJC cartridge dust collector				
Standard	2014/34/EC, 2004/108/EC, 2006/95/EC, EN 13463-1, EN 60204-1				
Compressed air consumption	-8,0 to 5,5				
Installation	[Indoor], [Outdoor]				
Material	Housing: 2,0mm welded painted steel Clean air chamber: 2,0mm thick steel Dirty air chamber 2,0mm or 3,0mm Hopper typically 2,5mm thick.				
Suitable for combustible dust	True				
Suitable for combustible dust Filter cleaning method	True [PulseJet]				
Filter cleaning method	[PulseJet]				
Filter cleaning method Application	[PulseJet] [dust], [grit], [fumes] Standard: -8,0 to 2,0				
Filter cleaning method Application Working pressure (kPa)	[PulseJet] [dust], [grit], [fumes] Standard: -8,0 to 2,0 Optional: -15,0 to 5,0				
Filter cleaning method Application Working pressure (kPa) Dustbin volume (I)	[PulseJet] [dust], [grit], [fumes] Standard: -8,0 to 2,0 Optional: -15,0 to 5,0 75				
Filter cleaning method Application Working pressure (kPa) Dustbin volume (I) Filter Area (m²)	[PulseJet] [dust], [grit], [fumes] Standard: -8,0 to 2,0 Optional: -15,0 to 5,0 75 48 to 739				
Filter cleaning method Application Working pressure (kPa) Dustbin volume (I) Filter Area (m²) Capacity (max airflow m3/h)	[PulseJet] [dust], [grit], [fumes] Standard: -8,0 to 2,0 Optional: -15,0 to 5,0 75 48 to 739 190000

MJC Type 66 (6,6 m² cartridge) options

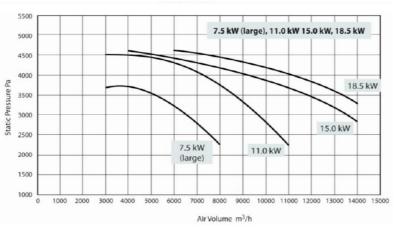

Performance of standard integral fan 0,75 - 3,0 kW, with open outlet, at running speed 2900/min.

Performance of standard integral fan 4,0 - 7,5 kW, with open outlet, at running speed 2900/min.

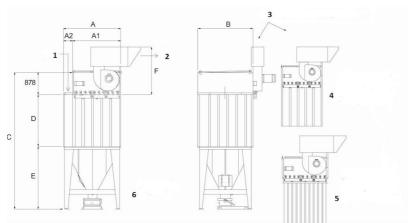

Performance of standard integral fan 7,5 - 18,5 kW, with open outlet, at running speed 2900/min.

Fans

Front and side view of standard MJC complete with typical fan and silencer, mounted on a bin hopper. Rotary valve, flap valve and other discharge options available.

Explanation figures:

- 1) Air inlet
- 2) Air outlet
- 3) Fan and silencer optional
- 4) Open base venting whit mounting flange at base of dirty air chamber
- 5) Insertable venting unit whit mounting flange at base of clean air chamber
- 6) Hopper outlet flange
