

NRS 3, rotary valves

Continuous emptying of the dust collector hopper

NRS3 rotary valve

The rotary valve type NRS3 is used for continuous emptying of material from the dust collector.

The rotary valve can be used for emptying of several non-adhesive material types. Max. particle size for the NRS3 is 3 x 3 x 10 mm (.1 x .1 x .4 in.)

- NRS3 rotary valve

The rotary valve type NRS3 is used for continuous emptying of material from the dust collector.

The rotary valve can be used for emptying of several non-adhesive material types. Max. particle size for the NRS3 is 3 x 3 x 10 mm (.1 x .1 x .4 in.)

NRS rotary valves 10, 20 and 30

The NRS type rotary valve is used to transfer material between two separate systems. In pneumatic conveying systems discharge is usually required from the filter or cyclone to the silo, at atmospheric pressure. This is an ideal application for the NRS type rotary valve.

The rotary valve can be used for most material types, though the particle size must not exceed 13 x 13 x 13 mm (.5 x .5 x .5 in).

- Effective air lock between the inlet and outlet provided due to the special rubber blades.

Product name	NRS 3, rotary valves
Noise level (dB(A))	< 70
Installation	[Indoor], [Outdoor]
Material	Galvanised steel plate
Suitable for combustible dust	False
Application	[dust]
Operating Temperature	-4 to 104 F (-20 to 40 C)

Dust

NRS 3, rotary valves

Weight (lbs)	Power (Hp)	[model]
		73009042*
32	0,18	73008861**
40	0,25	73009031**
32	0,18	73009228**

*Without motor

**Capacity at 100% filling - 2,3 m³/h

NRS 3, rotary valves

Leakage

The leakage of the rotary valve during shutdown (S) and during operation (R) depends on the pressure drop over the rotor. See the diagramme.
