

SiloSafe Filter

Compact reverse jet tubular cartridge dust collector

Specifically suited for use on silos that are pneumatically filled. The SiloSafe compact reverse jet tubular cartridge dust collector, available as a venting filter or with an integral fan, was developed specifically for silo and bin venting applications – incorporating Nederman UniClean (patented) cartridge technology for maximum cleaning efficiency and extended life.

Typical applications for the SiloSafe filter are venting of pneumatically and continuously filled silos and bins, for cement batching and in distribution facilities.

- Robust fully welded steel, hot dip galvanized construction. Weatherproof for exposed locations.
- High strength, independently tested to resist explosions, for ATEX compatibility.
- Tough integral mounting flange.
- Low height, minimal visual impact.
- Safe maintenance from clean air side.
