

Flap Valve, KV

Valve for welding, cleaning and grinding.

Suited for welding, cleaning and grinding where automatic valves are not required. The flap valve is made of electrically conductive plastic material.

The flap valve kits come in four versions:

To fit 63 mm piping system, wall mounted on suction pipe

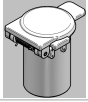

To fit 63 mm piping system, hanging on vacuum hose

The flap valve is made of electrically conductive plastic material, and the flex hose is equipped with copper wire to remove static electricity.

Male coupling Ø 50 mm fits directly into the flap valve

Product name	Flap Valve, KV
---------------------	----------------

Flap Valve, KV

[Image]	Description	Diameter (mm)	[model]
	Flap valve with 50mm hose coupling for mounting on hose	50	40146455
	KV50 Aluminium	63	40141500
	KV50	63	40146180
	KV50SP, For mounting on spiro duct.	63	40146457
	KV50T, with thread		40146370
	KV50 cpl		40146450

Flap Valve, KV

	[accessory]	[partno]
	AS set with microswitch for automatic start/stop of vacuum unit. For KV50 A (Aluminium).	40141760
	AS-set microswitch P, for KV50 cpl.	40141550
