Industrial vacuum cleaner for removal of industrial waste materials

Dual container system, designed for removal of industrial waste. This powerful suction unit comes equipped with a silo and filter container for the removal of industrial waste materials. Special swivelling, locking wheels are sized to increase mobility, and make the handling of heavy loads simple. The silo is designed to allow the collected material to be discharged over gratings or chutes for the central collection of materials. The model include slots for handling by forklift.

- Dry waste suction
- Silo pre-separator with manual outlet valve
- Fork lift handling
- Sturdy trolley system with large wheels for uneven ground
