

## **OSF2000**

Nederman OSF oil smoke eliminators are designed to handle large amounts of oil smoke during continuous operation. They are developed with focus on high efficient filtration together with low maintenance cost.

Nederman OSF 2000 has as standard three filter-stages

where the two first stages consists of filter cassettes with Nederman's FibreDrain™ technology. Nederman has a wide range of different types of fibre beds to suit all different types of applications. The third stage consists of a HEPA filter in filter class H13 with an
