

Benchtop Extraction Kits

Nederman Benchtop Extraction kits provide a quick and convenient solution for creating a fume-free workplace.

Benchtop Extraction Kits

The Bench Top extraction kits include arm(s) with hood or nozzle, fan with speed control, and a multi-layer standard filter for particle and odor removal with integrated HEPA for high-efficiency filtration, along with hose, connection details, and table bracket. The speed of the fan is variably controlled by a speed controller. Complete with hoses and extraction hoods. The hood is made of clear plastic, which increases the visibility.
