

Fan Starter

Fan Starter

- ✓ Reduces energy costs
- ✓ Minimizes the volume of heated air extracted air from the premises
- ✓ Allows a stop delay of up to 5 minutes to ensure extraction of remaining dust and fumes

Nederman Fan Starter is a conventional direct (DOL) or Y/ Δ -starter for the NCF fans in extraction systems.

Fan Starter PTC is equipped with PTC relay for NCF EX fans with PTC thermistors in motor.

Fan Starter PTC must be mounted outside EX-zone.

It works with manual start/stop only or with any sensor signal from equipment in fume or dust extraction system, as well as in exhaust extraction systems.

Fan Starter

Certifications	CE
Protection class	IP 65
Installation	Indoor
Further technical data	Power: 2,2 - 22kW Voltage: 400V 3~(+N) 50Hz Transformer output: 24V 150VA
