Ventilation hose PE-EL

For high chemical resistance

Ventilation hose PE-EL

- ✓ The hose is equipped with a ground cable in each end of the helix
- ✓ Good resistance to mineral oil, alkalis, acids and most of other types of chemicals
- ✓ Highly flexible
- ✓ Electrical properties and surface resistance; $<10k \Omega$. Conforms to the requirements of the European ATEX directive

The ventilation hose is suitable for aggressive solids such as dust, powder and fibers as well as for aggressive gaseous media, such as vapors and smoke. It is also suitable for areas liable to contain combustible dust.

Ventilation hose PE-EL

[ProductCertifications]	[esd], [ex]
Material	Electrically conductive Polyethylene
Ambient temperature range	-35°C to +80°C

Models

	Item no	Diameter (mm)	Length (m)	Weight (kg)
	10374423	160	2	1,2
	10374424	160	3	1,7
	10374425	160	4	2,3
