## MCP SmartFilter

MCP SmartFilter is a multi-purpose filtration system. It is customizable to perfectly fit customer specific demands with airflow up to 28,000 m<sup>3</sup>/h. Suitable for smoke, fumes and dust and can be used in several different applications such as welding, metal cutting and general dust.

The modular design allows for standalone solutions as well as multi-filter solutions for extended requirements. With a new and innovative cartridge design - the squircle shape utilizes the square space within the dust collector in the most optimal way and generates high cartridge airflow. Thus, decreasing the size and hence the footprint of the system.

Constructed with 2 mm galvanized steel panels, it is easy to install, cost effective to ship and provides corrosion protection. The design is optimized for long filter lifetime providing low cost of ownership. Insight ready control with advanced pulse cleaning logic provides for full system operation including control and monitoring, as well as gateway functionality for cloud communication.

The MCP SmartFilter has a large accessories program including; fans, inlets, bins etc. and the cartridges are available in a wide variety of materials.

- Gain control over filtration performance with Insight Analytics. Nederman's unique monitoring technology.
- Optimized footprint through innovative cartridge design with high airflow.
- Reduced TCO through intelligent cleaning system, long filter cartridge life-time and optimized footprint.
- Future Proof system that is IoT prepared- Insight Ready.
- Controller, HMI and Gateway all in one unit with the Insight Control Panel.
